### **DETAILED ACTION**

1. This Office action is responsive to the following communication: Original Application filed on 29 December 2003.
2. Claims 1-68 are pending and present for examination. Claims 1, 15, 29, 43, 44, 51, 58, and 65 are independent.

### ***Election/Restrictions***

3. This application contains claims directed to the following patentably distinct species:  
Group 1: Claims 1-43 relate to a method/machine-readable medium/apparatus for receiving data being written to a data block, and indicating the data block being stored on a second storage image.

Group 2: Claims 44-68 relate to a method/machine-readable medium/apparatus/data storage system for preserving data in a data processing system using an I/O process.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one

of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
